

COREFLEET

Light Commercial Vehicle Rental & Lease Solutions

Our History

With origins dating back to the late 1960's, Corefleet has evolved from a family owned West Australian based rental and mechanical services company, to a national fleet services organisation and a member of the Sime Darby group of companies.

What Drives Us

Corefleet follows four prominent Core Values that the business lives up to throughout our operations nationwide in order to fulfill customers' needs. This helps guide the way our employees work together and with people outside of the business.

The business is proud of its long tenured and diverse team that continues to contribute to a wealth of knowledge, experience and exceptional customer service.

Integrity • Respect & Responsibility • Enterprise • Excellence

Flexible Rental Solutions

*Corefleet's key service offering for the past 50 years has been **light commercial vehicles**, deployed in most major mining and civil constructions projects across Australia.*

Whether you're looking for a 2WD or 4WD, dual cab or single cab, tray back ute or large wagon, small or large bus, we have you covered.

Safety Comes First

*Our vehicle range includes options of ANCAP 5 compliant and ROPS (Roll Over Protection System) mine specifications. With our purchasing power as a leading industry player and as a **Sime Darby Motors** entity, further requirements to add or remove accessories to suit specific applications can easily be satisfied.*

A full-page background image showing a dirt road that stretches into the distance, flanked by dense, green trees. The road is reddish-brown and shows tire tracks. The trees are tall and thin, with some bare branches visible against a bright sky. The overall scene is a natural, wooded area.

Customised Lease Solution

Corefleet provides operating lease solutions with flexible terms and maintenance options across our standard and extended vehicle range.

Specialist Providers

We are specialist providers of customised vehicles designed for harsh environments. Corefleet have built vehicles for a range of applications including mine specifications, underground operations, conveyor belt maintenance, renewable & gas projects, civil infrastructure, bus and truck modifications.
